Cisco Stealthwatch Security

SSO

COURSE OVERVIEW

Cisco Stealthwatch Security is an instructor-led, lab-based, hands-on course offered by the Cisco Stealthwatch Learning Services team. This two-day course focuses on using Cisco Steal-thwatch Enterprise from the perspective of a security analyst. The overarching goal of the course is to use the Stealthwatch System to investigate potential security issues and make initial determinations on whether to proceed with a more thorough investigation or move on to the next potential threat.

WHO SHOULD ATTEND

The primary audience for this course is as follows:

- This course is intended for individuals who are responsible for using Stealthwatch to monitor security policy, provide feedback on the configuration, and initiate incident response investigations
- An entry-level security analyst is the ideal audience for this class

COURSE OBJECTIVES

Upon completing this course, the learner will be able to meet these overall objectives:

- Describe how the Stealthwatch System provides network visibility through monitoring and detection
- Describe the goals of using Stealthwatch in the proactive and operational modes
- Define the basic concepts of investigation and detection of potential security issues using the Stealthwatch System
- Complete workflows to identify indicators of compromise in your network
- Describe alarm types and alarm notifications within Stealthwatch
- Explain the utility of maps in the Stealthwatch System
- Describe how the Stealthwatch System contributes to successful incident handling
