

Use Case

# Meet Arjun

Head of Technology, Finance Institution

Needs to plan, design, and **implement** a **Cisco SD-WAN** solution across 300+ sites in India.

The objective was to **execute** a **Cisco SD-WAN** Mentored Install for enhanced network efficiency and connectivity.

# How We Helped Arjun Win

## Challenge

01

---

### Large-Scale Implementation

Implementing Cisco SD-WAN across 300+ sites in a large-scale banking environment posed a significant challenge.

02

---

### Customized Network Design

Designing a network that caters to the unique requirements of a financial institution, including business-critical applications and QoS considerations.

03

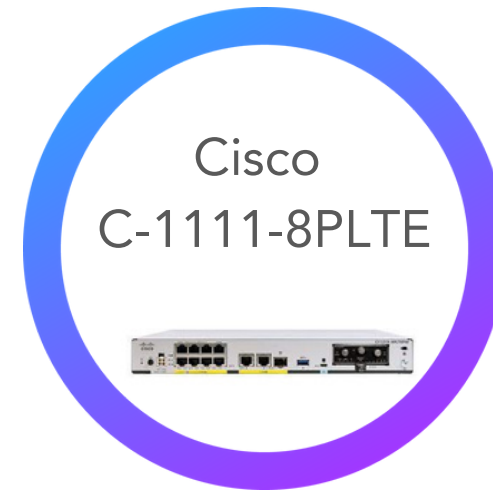

---

### Efficient Use of Resources

Ensuring efficient deployment and utilization of on-site resources during the implementation process.

Use Case

# Solution Scope

Use Case

# OUTCOME

EnterOne collaborated closely with the customer to address the challenges and deliver a tailored Cisco SD-WAN solution.

01

## Large-Scale Implementation

Successfully implemented Cisco SD-WAN across 300+ sites, ensuring a smooth and efficient deployment.

04

## Aware Routing and QoS

Application Aware Routing and QoS policies were implemented to prioritize Audio/Video, Critical Applications, and Default traffic, ensuring optimal performance.

02

## Tailored Network Design

The custom Hub and Spoke topology and centralized policies addressed the unique requirements of a financial institution, particularly business-critical applications.

05

## Comprehensive Monitoring

Integration with LiveNX enhanced monitoring capabilities, allowing for real-time insights and effective flow tracking.

03

## Enhanced Performance

The deployment of a vManage Cluster provided redundancy, enhanced performance, and scalability for future growth.
